### Free Website Templates Now Available From Graphic Technique

**(June 1, 2009) Newnan, GA** – Graphic Technique announced today that free website templates are now available for download at [www.graphictechnique.com](http://www.graphictechnique.com). There are currently three templates available, Business Basics, Business Bold and Real Estate Simplicity, with more to come. Graphic Technique has spent some time sourcing photography from the Public Domain for use in the templates so that business owners can just add their content and get a site up as quickly as possible.

The free templates are being made available to help businesses succeed in the current economic climate. Graphic Technique's owner, Chris Frishe said, "My hope is that businesses that could not afford to get online will now find it possible with free, professionally designed templates." New templates will be added to the library on an ongoing basis. The templates have a variety of styles and colors to suit most businesses. "The templates are just a small way for me to help the economy. If the barriers to producing income are reduced or eliminated, it will be possible for the economy as whole to recover more quickly." said Frishe.

Frishe opened Graphic Technique 1994. Graphic Technique is a full service design firm specializing in creating customized online identities for small to medium size businesses. Chris Frishe designs identity materials such as logos and print collateral and is able to extend the reach of those materials with the design of dynamic websites and Flash animation.
